

## **Introducing TechGuard Mesh!**

**The ultimate solution for safeguarding your electronics during cleaning and handling processes. Our high-temperature, ESD-safe, chemical-resistant rubber mesh provides unparalleled protection for delicate PCBs. Whether used as a liner in totes or as a mat on benches, TechGuard Mesh ensures your components remain safe from damage and contamination. Trust TechGuard Mesh to shield your valuable electronics, every time.**

- \*Continuous use temperature rating is 60 degrees Centigrade or 140 degrees Fahrenheit.**
- \*Hardness is shore A5-D80.**
- \*Currently available in 18" x 18" or smaller, please reach out if larger sizes are required.**
- \*Chemical resistant to water, Oil, and Mild Acids. May not fare well against strong solvents like acetyl chloride or acrylonitrile. Resisting some alkali but extremely strong alkali may be an issue.**
- \*Does not conduct heat or electricity.**
- \*Dissipative**
